About the technology Although many deep learning tools use Python, the PyTorch library is truly Pythonic. Instantly familiar to anyone who knows PyData tools like NumPy and scikit-learn, PyTorch simplifies deep learning without sacrificing advanced features. It's excellent for building quick models, and it scales smoothly from laptop to enterprise. Because companies like Apple, Facebook, and JPMorgan Chase rely on PyTorch, it's a great skill to have as you

It minimizes cognitive overhead without sacrificing the access to advanced features, meaning you can focus on what matters the most - building and training the latest and greatest deep learning models and contribute to making a dent in the world. PyTorch is also a snap to scale and extend, and it partners well with other Python tooling. PyTorch has been adopted by hundreds of deep learning practitioners and several first-class players like FAIR, OpenAI, FastAI and Purdue. Thirty years later, his son Jacques went to the bottom of the earth, descending to the Mariana Trench in a submarine built by him and Auguste. To this day, no one has gone deeper. Bertrand, the third generation, was the first person to fly around the world non-stop in a balloon. Now, he's building his own craft: a solar-powered plane to circumnavigate the globe. In *The Explorer Gene*, Tom Cheshire asks how three generations of one family achieved such extraordinary feats, often with the consensus against them. None of the Piccards set out to explore: Auguste was a physicist, Jacques an economist and Bertrand a psychiatrist. Was it fate, a famous family name – or their explorer gene?
