

What is the Optioneering Strategy The Optioneering Strategy is an options trading strategy that was developed and perfected over the past 4 1/2 years. The options strategy finds its roots in market statistics and is designed to minimize risk. The fundamental difference between the Optioneering strategy and any other stock or options trading strategy available today is that the Optioneering Strategy is a "Reactive Strategy". Practically all stock picking and option trading strategies (books and websites) are focused on helping investors more accurately "predict" the direction of a stock or the underlying market. With the Optioneering Strategy you don't need to predict which way the market is going to go you just need to react to it. Trying to predict what a stock or the stock market will do tomorrow, next week or next hour is impossible for the average investor. The number of inputs that move the markets on a day to day, hour by hour, minute by minute time frame are impossible to comprehend. Earnings, politics, economic data, geopolitical news, weather, terrorism, commodities, interest rates, the Fed, etc all move the markets. How can anyone possibly predict where the market will go next week, next month or next year with all these variables? Well some people out there claim they can. The spectrum is broad form charlatans who operate websites making ridiculous claims to professional financial advisers. Lets reflect on this for a moment. If you am ill, you see your doctor, you expect with a high degree of confidence that he/she will come to a diagnosis that is accurate and prescribe the necessary medication to see that you get better. How can a financial adviser "diagnose" the markets, a disease with constantly changing symptoms. They may claim they can but I would bet statistically they are no better than flipping a coin. Safety First A key objective of the Optioneering Strategy is to minimize risk. A strategy whereby if a loss were to occur it would not wipe out months of profit or wipe us out completely like so many other option strategies. The basic strategy is founded on establishing setup positions each month that generate a profit consistently. The setups involve a combination of debit calendar spreads and reverse credit calendar spreads. There are 7 basic rules, 4 on setup and 3 for closing. If you follow the rules losses will remain small and profits will be maximized. A lot of other books on option strategies will tell you how the strategies work but they won't tell you how to consistently generate profits by applying them. They still require you to correctly "bet" on market direction. Applying standard option trading strategies in a predictive manner is no better than flipping a coin and runs the risk of generating large losses. Minimal Capital I started with \$20,000, but one could easily get started with as little as \$5000 to \$10,000. The Optioneering Strategy is structured to minimized risk and margin. It is a brilliantly leveraged, yet a well hedged strategy that generates a profit 84% of the time. Over 4 1/2 years I grew \$20,000 to over \$200,000. During that period I placed 44 trade set ups of which 37 generated a profit and 7 resulted in a loss. The average or 37 monthly profits was \$5,350 and the average of 7 monthly losses was \$1950. Minimal Time Invested Other than making money saving time is the second best part of the strategy. Most days I spend 1 to 2 minutes a day just checking the market. Really just keeping an eye on it in the event I need to "react" to the market action. On my setup days it takes me about 10 minutes to get my order in and set. That's it! Minimal time invested. I don't need to know the news that drives the market and I don't really care. I only need to react to the market if it moves to prescribed limits we establish with each setup trade. "Getting time back is the best part of the Optioneering Strategy. I can focus on work and spend more time with my family" Less Stress and Anxiety With the Optioneering Strategy you place the exact same type of trades every month at the same time, regardless of what the market has done or is doing. There are a total of 7 rules to follow and they guide you on setting up the trade and exiting the trade. Investment stress and anxiety are rooted in trying to decide if you should buy, sell or hold your positions. With the Optioneering Strategy there is none of that as you have certainly in what to do when entering and exiting every trade. Getting Started Whether you are familiar with options or not the Optioneering Strategy is written with the novice in mind. Not only will it inform you of what you need to know but walks you through every trade placed over the past 4 1/2 years. Every trade contains a chart, historic options chain data and commentary on every trade. The Optioneering Strategy allows you to take control of your financial future. That's what I did and I'm now sharing this experience with you.

Change the way you move . . . and you can change the way you feel, the way you act, and the way you're perceived. That's the promise of EVERY MOVE YOU MAKE: Bodymind Exercises to Transform Your Life. We've long known that changing our mental or emotional focus can help change our physical state (think of stress management for patients at risk for heart attacks or visualizations to improve athletic performance). It's the mind-to-body connection, and it's something that's readily accepted in today's world. Less well explored is the other side of the equation: the relationship between body and mind: Change your physical state and you can change your mental or emotional focus; change the way you move in deliberate, carefully prescribed ways—that is, repattern your body—and you can repattern your mind, emotions, and spirit in ways that let you live your life more fully, more authentically, and more joyously. Every Move You Make gives you practical tools in the form of ten basic movements that help stimulate and support changes you need to make your life work better. Also included are several partner exercises to improve the quality of your relationships. The movements are easy and relaxing to do, and are illustrated in photographs throughout the book. Chapters address different aspects of life: self-image, stress, career, creativity, relationships, sexuality, anxieties, and compulsions. You'll identify with the case studies of real people that Nikki Winston has worked with—all of whom have successfully made the changes described.

Con Man In December 1989, in upstate New York, Gary C. Evans, 35, a master of disguise and career criminal who had befriended David "Son of Sam" Berkowitz, began weaving a web of deadly lies. Evans told a female friend that Damien Cuomo, the father of her child, had deserted her. Of that he could be certain, since he'd killed Cuomo, and subsequently struck up a ten-year romance with the woman while tricking her into believing Cuomo was still alive. Law Man Evans first met New York State Police Senior Investigator James Horton in 1985, when Evans fingered Michael Falco, 26, as the brains behind their theft team--yet failed to mention that he'd murdered him. Then, two local jewelry dealers were killed. In 1997 Tim Rysedorph, 39, another old friend, went missing. Was Evans responsible? Horton launched a nationwide manhunt to uncover the truth. End Game For more than thirteen years, Evans and Horton maintained an odd relationship--part friendship, part manipulation--with Evans serving as a snitch while the tenacious investigator searched for the answers that would put him away. After Horton used Evans as a pawn to obtain a confession from a local killer, Evans led Horton in a final game of cat-and-mouse: a battle of wits that would culminate in the most shocking death of all. . . 16 Pages Of Revealing Photos
